

## Sage BusinessVision 2010: Recommended System Configuration

### Microsoft Windows® 7

Microsoft Windows 7 is now available from Microsoft and is included on new computer systems. Windows 7 offers several improvements to security and desktop management. The security improvements in Windows 7 help to minimize the likelihood of malware attacks; unfortunately, they may also prevent legitimate software applications from operating correctly since many applications require either full or administrator rights. We encourage you to double-check that all of your Sage, third-party, and other programs are fully compliant before upgrading. Sage BusinessVision 2010 will run on Microsoft Windows 7, and you must run Pervasive version v10.30 or higher to be compatible.

### System Recommendations

The recommended system configurations are as follows:

	Workstation	File Server
<b>Operating System</b>	Microsoft Windows Microsoft Windows XP Professional w/ SP2 Microsoft Windows 2000 Professional w/ SP4 Microsoft Windows Vista® Microsoft Windows 7	Microsoft Windows 2008 R2 Server Microsoft Windows 2008 Server Microsoft Windows 2003 Server w/ SP1 Microsoft Windows 2000 Server w/ SP4 Microsoft Windows 2000 Advanced Server w/ SP4
